

## Welcome to **Maverick Brothers Mammoth House**

Please make our house yours. We hope you enjoy it as much as we do.

You are just a short walk to Eagle Ski Lodge  
and  
Sierra Star Golf course.

We found the best entry and exit to this house is through the door via the garage. The front tends to get icy and snowy during big storms. This is where you want to keep all your skiing/fishing and golf gear.

There are multiple ski/snowboard racks. Look for the individual gravity holding ones on the garage wall they are the best!

Please keep this the landing spot for equipment. There are some spots in the laundry room to hang jackets and other stuff bulky items.

There is a SECRET boot and glove warmer located in the garage utility closet. Timer is on the bottom right side.

Sauna is great but temperamental. If too much water is used, or temp gets too high this will pop the reset breaker. The reset button is on the bottom of heater – look for the little hole. You will need to use a little screwdriver stored in the kitchen drawer and push up until it clicks.

BBQ is off the back deck adjacent to kitchen. It is tied to the house propane and will need to be turned off and on using the valve next the BBQ,. It is self-lighting, but if it has problems, lighters are in kitchen drawer. Please keep valve closed when not in use.

Fireplace is awesome and can warm most of the house if used correctly. After the fire is going close and lock doors. At a preset temperature the fan will begin blowing hot air into the room.

## Thermostats

There are four thermostats in this house.

1. Master Bedroom upstairs
2. Main upstairs by kitchen
3. Main downstairs in hall
4. Floor heater in Master bath downstairs.

Please keep temp 68 and below and turn down the 55 when you leave. We found that at 63-65 the place is at a good temp with the fire going it gets up in the low 70's and it is hot after skiing all day. The downstairs floor heater will cook the master and middle room at night. I would highly recommend keeping that set low as well.

We have some bikes, sleds and fishing poles that you are more than welcome to use.

\*\*\*\*Important\*\*\*\*

[Snowplow](#) comes into the driveway and clears it pretty well. Please make sure all cars are in garage or moved before they come. They come at all times of the day and night. I.e. if it is snowing or going to snow. Otherwise, they can't get to all the snow and you might be stuck with some digging to do.

[Keep garage doors shut](#). If there is trash or food in garage or cars the bears will come. Winter or summer.

## **Fire alarm**

**The smoke detectors are right next to the kitchen and attached to the fire dept. If you burn some bacon or toast you run the risk of setting the alarm off. I have done it a couple of times. Use vent fans over stove and I crack the kitchen window.**

We left you a bottle of our California wine to enjoy.

Please take some time to sign our guest book and leave a review with Mammoth Reservations. And let us know what you enjoyed and how we can make your experience better.

**For problems or questions please contact Mammoth Reservations**

**EMERGENCIES:** Call 1-800-223-3032, extension 6 (six) for after hours emergencies. Please note: This is a message-only system. After you leave a message, an on-call staff member will return your call. If you do not leave a message, we cannot call you back. This line is for emergencies only. All after hours Guest Service voicemail messages will be returned the following business day.
